

# PROTEK

# Wood Protector & Clear Tough Coat

## Wood Protector

A multi-purpose versatile wood stain and protector that coats and protects the whole garden. Wood Protector is a high quality coating that weatherproofs and protects all varieties of outdoor surfaces. The Wood Protector range is available in over 30 inspiring colours and complimentary shades that rejuvenate old and tired looking timber, giving an all year round colour that is strong and lasts. It is so good it will even adhere to masonry and terracotta pots.

Wood Protector can be applied by brush, HVLP (high volume low pressure) sprayer or roller. It is quick drying and will last up to 3 years.

Protek Wood Protector creates a micro-porous waterproof coating that contains a mould inhibitor to protect the coating. Wood Protector is very low in VOC (volatile organic compounds) and the use of blended organic pigments ensures that the colours are bright, pure and long lasting.

✓ Fencing & Trelliswork

## Clear Tough Coat

As part of the Wood Protector range, this clear wood stain dries to leave behind a hard wearing clear coating that acts as a protective sealant to garden timber. Tough Coat can be applied as a top coat to Wood Protector as an

extra shield to protect a colour underneath from wear and tear. Protek Clear Tough Coat helps to protect garden wood from year round outdoor life.

You can apply Tough Coat to all types of garden buildings to give them an extra protective layer of water-proofing.

Protek Tough Coat is also ideal for protecting internal walls and floors in garden buildings and log cabins. Once dry Protek Tough Coat not only protects internal walls and floors of garden buildings, but leaves behind a coating that can be wiped clean.

**AVAILABLE IN 1, 5 and 25 LITRE CONTAINERS**
